# SERVICES

## Pressure Testing

As a nationally recognized leader in pressure testing, Legends has the capability to test the smallest fabrication assembly to the largest cross-country transmission lines.

## Dehydration

Leftover liquid in pipelines can lead to corrosion and hydrate formation. Legends ensures that your pipelines are dried to the standard dew point of -40 degrees.

## Pipeline Integrity Division

Manage pressure, remove contaminants, and maintain the integrity of critical infrastructure with our pipeline integrity division.

- Flaring
- Filtration
- Separation

**Any Project.  
Any Scale.  
Legends Can.**

## Pigging

Inspecting pipelines for corrosion, cracks, and other anomalies is key to maintaining integrity. Legends is equipped to assess your lines through in-line inspections (ILI) and smart pigging assists.

## Pipeline Cleaning

Buildup in pipelines can restrict flow and impact efficiency. Legends provides chemical and mechanical cleaning services that can be done online and offline.
